

Ammon Warnick

Senior Software Engineer

801 835 4048 | Glendale, AZ, USA | www.linkedin.com/in/ammon-warnick | warnick.ammon@gmail.com

Summary

Full-stack Software Engineer (6 years) with strong experience designing, developing, and deploying scalable, high-quality software solutions across web UI, backend services, and platform layers using **TypeScript, React, Node.js, and C#**. Proven ability to contribute to the full software development lifecycle in collaborative, **cross-functional environments**, partnering closely **with product managers, engineers, and UI/UX designers** to deliver user-focused, data-driven features. Experienced in building **cloud-native applications leveraging AWS services** (Lambda, S3) and CI/CD pipelines, with a focus on performance, scalability, reliability, and maintainability. Familiar with modern architectural patterns and continuously improving engineering practices, with a demonstrated passion for building innovative, scalable products and **growing within high-performing teams**.

WORK HISTORY

GMetrix LLC — Software Engineer (I → II → Sr.)

Sept 2022 – Present

Full-Stack Development & Product Delivery

- Built and maintained user-facing and admin applications using **React, TypeScript, C#, and SQL**, supporting growth of 15% year over year.
- Collaborated closely with **product managers, UI/UX teams, and support teams** to refine requirements and deliver high-impact features.
- Contributed to **end-to-end feature development** across UI, backend services, and database layers.

Scalability, Performance & Architecture

- Improved application performance and reliability by identifying bottlenecks and optimizing queries and frontend rendering.
- Contributed to **system design decisions** and adoption of scalable architectural patterns.
- Helped **maintain clean, modular code** aligned with team standards and best practices.

Team Collaboration & Engineering Excellence

- Participated in **code reviews, estimation, and sprint planning**, contributing to consistent delivery of team milestones.
- Mentored junior engineers, improving code quality and team velocity.
- Drove improvements in development workflows and engineering practices.

Sawtooth Software — Software QA Engineer (jr. → I)

May 2019 - September 2022

- Designed and implemented **automated test suites** using C#, Selenium, and Angular for enterprise market research tools.
- Partnered with engineering teams to **identify, prioritize, and resolve defects**, improving product stability.
- Worked closely with developers and product stakeholders in **agile environments** to ensure

high-quality releases.

- Contributed to **continuous integration pipelines** and testing strategies.
